Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Introduction

The ninth Metamaterials Conference hosted by SPIE in Europe enjoyed strong international audiences and fruitful discussions right through the end of the conference. During informal discussions with the session Chairs, we agreed that the quality of the presentations had increased from an already previously high threshold.

Active Metamaterials featured in three of the sessions with new sessions on Dielectric and Hyperbolic Metamaterials. Two sessions on fabrication included Nanofabrication and Self-Assembled Metamaterials. Sensors, Nonlinear Plasmonics and Metamaterials, Terahertz Metamaterials, Polarisation Control and Transformation Optics, completed the programme of nine sessions.

The venue, in the heart of Brussels, no doubt contributed to this very enjoyable conference. The Chairs of the meeting would like to thank all contributors to the conference, the SPIE team, and the programme committee.
